

NEWLINE BIKING

Newline has developed two very specialised concepts for indoor and outdoor biking. The driving force behind both concepts is Newline's latest technology offering a wide range of products with optimum fitting and high-performance fabrics with a lot of functional details for biking.

NEW IMPROVED INDOOR BIKING CONCEPT

Newline indoor biking concept is for fitness people, and the focus is on maximum sweat control. The products offer you superior sweat control but without compromising on lightness, softness and comfortability. The concept features a number of new technical products for men and women. The products are designed with a new aggressive look for indoor biking enthusiasts who love a workout to the beats of rhythmic music.

OUTDOOR BIKING CONCEPT

Newline's outdoor biking concept is constantly being improved and tested again and again to offer bike riders the finest and most functional products on the market. The outdoor biking concept contains products for all purposes whether you like to ride on the lonely high ways, in the rocky mountains or just want to go for an easy stroll. Newline has tailored a concept which exactly suit your needs as a passionate bike rider.

All products are functional, technical and with a vast number of exciting details which make exercising more fun and comfortable.

INDOOR BIKING

The indoor biking concept from Newline offers you technical products with superior sweat transporting properties for indoor use. For optimum performance, Newline has developed this functional concept with light, soft and comfortable products. New products in the concept include Race Tech Top with heart rate monitor for women, Loose Fit Shorts for men and Race Shorts with Braces for both men and women. Work out and be comfortable at the same time with Newline Indoor Biking technology.
